

INTERNAL COMMS

Macrocomm Health & Safety Department

INTERNAL COMMUNICATION: ISO 14001/EMS TRAINING

Dear Team,

As part of our commitment to environmental sustainability, all employees are required to complete the introduction to ISO 14001/Environmental Management Systems (EMS) training by 14th March 2025.

This training will provide an understanding of the importance of EMS and how we can reduce our environmental impact, improve operational efficiency, and comply with regulations. It focuses on areas such as pollution prevention, energy conservation, and waste reduction, key to achieving both legal compliance and business goals.

Key benefits of implementing EMS include:

- Reducing environmental impact and managing emissions, waste, and hazardous materials.
- Improving energy efficiency and reducing operational costs.
- Contributing to sustainable business practices and enhancing stakeholder relationships.

Macrocomm Group has incorporated the EMS into the Health and Safety Environment Plans, Policies, and Procedures. *All employees play* an important role in supporting this system and ensuring our ongoing compliance.

Please complete the training using the following link:
